

***Even in these uncertain times the sun still rises everyday.
Let us help you use the sun to make a better future***

With many individuals working from home with increased daytime loads and pressure on the electricity grid, now could be a good time to consider solar energy and battery storage for your home.

CONTACTLESS SOLAR

To protect you and our staff from the impacts of COVID-19, we have implemented new controls that allow our business to continue operating and limit the need for any direct contact between our employees and our customers.

- All quotations can be done without contact
- We will conduct the initial consultation over the phone to review
- Following this call we will send our designer to your property to safely take photos of your switchboard and roof
- If you prefer we don't come to the site we will ask you to take some photos and send them electronically
- We will use your photos and high definition aerial images to prepare a proposal and send it to your email
- When you have had a few days to review the proposal, we will contact you by phone or email to answer any questions

Contactless Installation

- Upon arrival the site electrician will call you to discuss the installation and confirm placement of equipment
- Should we need to enter your home during installation we will call you and take the following precautions;
 1. **Sanitize hands upon entry and after leaving the home**
 2. **Wear a face mask in the home**
 3. **Minimize time spent in the home**
- Upon completion we will call to advise and let you know next steps
- Soon after you will receive a text message requesting your electronic signature
- The next day our customer service team will call you to check in and answer any questions

Please contact the team on 62347009 with any questions
